### MASTER FORMAT #033000 - VAPOR BARRIER

## XTREME MASTIC

### DESCRIPTION

Tex-Trude Xtreme Mastic is a rapid curing water-based, polymer-modified anionic bituminous/asphalt. Xtreme Mastic is designed to be installed around penetrations (pipes) protruding through the vapor barrier. It is very effective when sealing more than one penetrations that are close together. Xtreme Mastic has an outstanding bond to the Xtreme Vapor Barrier and when used properly helps aid in the protection of concrete from vapor transfer.

### INSTALLATION

Prior to installation, perform a visual inspection of the Xtreme Vapor Barrier to insure a 6" overlap has been achieved and the penetration to insure all dust, dirt, debris, moisture has been removed. It is important to apply the Xtreme Mastic liberally on the penetration, forming a monolith coating (minimum of 64 mil thick) attaching the Xtreme Vapor Barrier and the penetration.
